

Governance, Risk and Compliance Practice

UTC GRC Practice Services

Enterprise Risk Management:

Enable organizations to identify, assess, quantify, monitor, and manage their enterprise risk in an integrated manner.

Policy Lifecycle Management:

Enable organizations to adopt an electronic and automated approach to create, maintain, publish, and communicate policies and procedures across the enterprise.

Compliance Management:

Provide management of all compliance requirements faced by an organization.

Regulatory Change Management:

Provide a centralized framework to aggregate content from regulatory sources, tag key information, triage and route critical regulatory alerts to relevant stakeholders/SMEs, and determine the impact of regulatory updates on the organization.

Controls Management:

Enable lifecycle management of controls risk and compliance controls.

Business Continuity, Threat and Vulnerability Management:

Offer comprehensive capabilities for BIA, BCP, Reporting, DR planning, and Risk Assessment as part of the BCM process.

Full End-to-End Implementation:

We provide the entire team or augment your staff with experienced professionals to provide planning, requirements analysis, develop Requests for Proposals, integration development, testing, documentation and training.

Ongoing Support:

We can provide individual resources or a team to provide ongoing post implementation user support, update/enhancements and ongoing training.

MetricStream

UTC and MetricStream Together

UTC Associates has partnered with MetricStream to help customers across a number of industries deploy, integrate and support MetricStream's best in class GRC solutions.
